

Marco Ogaz-Vega

(949) 444-6606 | marcoogazvega@hotmail.com | Oakland, CA

Summary

I am a highly motivated and results oriented graduate from UC Santa Cruz College of Engineering with Bachelors in Computer Science and specialty in Game Design. I have progressive experience in coding and game development. Seeking to leverage a strong foundation in C++, C#, Python, Java, HTML, TypeScript, and JavaScript, along with a proven ability to rapidly learn new languages and technologies.

Education

University of California, Santa Cruz | Santa Cruz, California

Bachelor's Degree in Computer Science: Game Design 3.89+ GPA | 06/2025

Saddleback College | Mission Viejo, California

Associates Degree in Computer Science 3.7+ GPA | 06/2023

Skills

Communication Skills, Web Development, Sound Design, Problem Solving, Systems Design, Teaching, Customer Service, Git, Python, Java, C/C++, JavaScript, HTML/CSS, Godot, Unity, Blender

Experience

Learn2Code.Live | Oakland, CA

STEM Instructor | 09/2026 - Present

- Instructed classrooms of 5-15 students in Lego Robotics, Scratch, AI, Web Development, and Game Development
- Facilitated student engagement and enrichment through interactive activities and projects
- Developed comprehensive lesson plans tailored to the needs and interests of students
- Implemented hands-on learning experiences to enhance understanding of STEM concepts
- Utilized innovative teaching methods to foster creativity and critical thinking skills
- Collaborated with colleagues to continuously improve teaching strategies and curriculum

TheCoderSchool | Los Gatos, California

Code Coach | 08/2025 - 05/2026

- Collaborated with students to develop projects in Scratch, C, Unity, and Godot
- Mentored students in code development, web development, and game development projects
- Provided one-on-one support to students in enhancing their coding skills
- Facilitated student learning by guiding them in creating engaging projects
- Assisted students in troubleshooting coding challenges and errors

Projects

The War Machine - December 2025 - June 2026

A single player 1st person rogue-like inspired by wave focused games like Call of Duty: Zombies. Developed using C and an OpenGL framework to implement procedural generation, combat systems, and player progression mechanics for re-playable sessions. The game is available for free on Steam.

Million Card Game - May 2024 - November 2025

Million Card Game is a card game inspired by my partner and a card game her and her family showed me. Developed using Javascript and the Phaser Game Engine to implement core mechanics, UI, and gameplay loops for a multi-player experience. The game is available on Steam now for free with an average of hundreds of concurrent players daily!
